

Vision for the Community

In October 2008, the People's Association (PA) began its workplan process to better align PA and the grassroots towards a *long-term shared vision for the community*. Over a eight-month period, PA, together with its stakeholders, co-created the vision for the community and a refreshed PA mission statement.

Vision for the Community

A Great Home and A Caring Community, where we
Share our Values,
Pursue our Passions,
Fulfil our Hopes, and
Treasure our Memories

The vision statement describes a great home where every Singaporean feels a strong sense of belonging, pride and rootedness, and a caring community where residents take initiative to organise meaningful activities for the community, and where neighbours care and look out for one another.

To reinforce the Vision, and to inspire every individual and stakeholder to take ownership of their community and step forward to contribute towards building a better home and community for all, a Vision tagline was also co-created.

Our Community. My Responsibility.

Our Community. My Responsibility.

Every individual in the community can contribute and make a difference. We need your active participation and contribution to help make our community a *Great Home and a Caring Community* for all!
